AIRAC AIP AMDT 04/15 25 JUN 2015

## 1. Summary Coдержание

### 1.1. GEN

GEN 0.4 section updated (page replacement).

обновлен раздел (замена листов).

GEN 2.5 section updated (page replacement).

обновлен раздел (замена листов).

GEN 2.7 section updated (page replacement):

aeronautical information about AD Khmel'nyts'kyi is deleted.

обновлен раздел (замена листов):

- исключена аэронавигационная информация, касающаяся АД Хмельницкий.

GEN 3.2.5 subsection updated (page replacement):

- aeronautical information about AD Khmel'nyts'kyi is deleted.

обновлен подраздел (замена листов):

- исключена аэронавигационная информация, касающаяся АД Хмельницкий.

GEN 3.5 section updated (page replacement):

aeronautical information about AD Khmel'nyts'kyi is deleted.

обновлен раздел (замена листов):

- исключена аэронавигационная информация, касающаяся АД Хмельницкий.

GEN 4.1 section updated (page replacement). обновлен раздел (замена листа).

1.2. ENR

**ENR 3.1** 

ENR 0.6 section updated (page replacement).

обновлен раздел (замена листов).

ENR 1.6 section updated (page replacement).

обновлен раздел (замена листа).

ENR 1.8 section updated (page replacement).

обновлен раздел (замена листов).

ENR 2.1 section updated (page replacement).

обновлен раздел (замена листов). section updated (page replacement).

обновлен раздел (замена листов).

ENR 3.2 section updated (page replacement):

added new routes T708, T719, T730, T731;

- name of route T709 change on T708. обновлен раздел (замена листов):

- добавлены новые маршруты Т719, Т730, Т731;

- маршрут Т709 переименован на 708.

ENR 4.1 section updated (page replacement):

- deleted Koshany (KO) NDB, Cherniakhiv (CH) NDB, Yahotyn (JA) NDB, Hel'miaziv (GE) NDB, Soloviivka (SL) NDB, Nemyriv (NM) NDB, Semenivka (SM) NDB, Stebliv

(SV) NDB, Trypillia (TR) NDB.

обновлен раздел (замена листов):

- удалены Koshany (KO) NDB, Cherniakhiv (CH) NDB, Yahotyn (JA) NDB, Hel'miaziv (GE) NDB, Soloviivka (SL) NDB, Nemyriv (NM) NDB, Semenivka (SM) NDB, Stebliv (SV) NDB, Trypillia (TR) NDB.

ENR 4.4 section updated (page replacement):

- added new pointes TUVOG, LAPVA, GOTAP, LULAP, VEBIX, NIROV, IDKOG, UMOGA, TABAV.

обновлен раздел (замена листов):

- добавлены новые точки TUVOG, LAPVA, GOTAP, LULAP, VEBIX, NIROV, IDKOG, UMOGA, TABAV.

ENR 5.1 section updated (page replacement):

- Prohibited area UK-P26 is deleted;
- Restricted areas UK-R418, UK-R437, UK-R715, UK-R759, UK-R773, UK-R774 are deleted;
- Dangerous areas UK-D105, UK-D113, UK-D118, UK-D301, UK-D301-31, UK-D301-32, UK-D301-33, UK-D301-34, UK-D301-35, UK-D301-36, UK-D301-37, UK-D301-38, UK-D301-39, UK-D301-40, UK-D301-41, UK-D301-42, UK-D301-43, UK-D301-47, UK-D301-48, UK-D301-49, UK-D301-50, UK-D301-51, UK-D301-52, UK-D301-53, UK-D301-54, UK-D301-55, UK-D301-56, UK-D301-57, UK-D301-58, UK-D301-59, UK-D302, UK-D302-01, UK-D302-02, UK-D302-03, UK-D302-04, UK-D302-05, UK-D302-06, UK-D302-07, UK-D302-08, UK-D302-09, UK-D302-11, UK-D302-12, UK-D302-13, UK-D302-14, UK-D302-15, UK-D302-16, UK-D302-17, UK-D302-18, UK-D302-19, UK-D302-20, UK-D302-24, UK-D302-44, UK-D302-46 are deleted. обновлен раздел (замена листов):
- удалена Запретная зона UK-P26;
- удалены Зоны ограничения полетов: UK-R418, UK-R437, UK-R715, UK-R759, UK-R773, UK-R774;
- удалены Опасные зоны: UK-D105, UK-D113, UK-D118, UK-D301, UK-D301-31, UK-D301-32, UK-D301-33, UK-D301-34, UK-D301-35, UK-D301-36, UK-D301-37, UK-D301-38, UK-D301-39, UK-D301-40, UK-D301-41, UK-D301-42, UK-D301-43, UK-D301-47, UK-D301-48, UK-D301-49, UK-D301-50, UK-D301-51, UK-D301-52, UK-D301-53, UK-D301-54, UK-D301-55, UK-D301-56, UK-D301-57, UK-D301-58, UK-D301-59, UK-D302, UK-D302-01, UK-D302-02, UK-D302-03, UK-D302-04, UK-D302-05, UK-D302-06, UK-D302-07, UK-D302-08, UK-D302-09, UK-D302-11, UK-D302-12, UK-D302-13, UK-D302-14, UK-D302-15, UK-D302-16, UK-D302-17, UK-D302-18, UK-D302-19, UK-D302-20, UK-D302-24, UK-D302-44, UK-D302-46.

ENR 5.2 section updated (page replacement):

- Training areas: UK-T708-01, UK-T708-01A, UK-T708-02, UK-T708-03A, UK-T718-01, UK-T718-02, UK-T719-01A, UK-T719-03A, UK-T719-03B, UK-T734-01, UK-T734-02, UK-T734-03, UK-T807-01, UK-T832-01, UK-T836, UK-T841 are deleted. обновлен раздел (замена листов):
- удалены Тренировочные зоны: UK-T708-01, UK-T708-01A, UK-T708-02, UK-T708-03A, UK-T718-01, UK-T718-02, UK-T719-01A, UK-T719-03A, UK-T719-03B, UK-T734-01, UK-T734-02, UK-T734-03, UK-T807-01, UK-T832-01, UK-T836, UK-T841.
- ENR 6 chart updated (page replacement). обновлена карта (замена листов).

### 1.3. AD

AD 0.4 section updated (page replacement). обновлен раздел (замена листов).

AD 0.6 section updated (page replacement):

- aeronautical information about AD Khmel'nyts'kyi is deleted. обновлен раздел (замена листов):
- исключена аэронавигационная информация, касающаяся АД Хмельницкий.
- AD 1.3 section updated (page replacement). обновлен раздел (замена листа).
- AD 1.5 section updated (page replacement).

обновлен раздел (замена листа). UKLN AD 2 updated chart: AD 2.24.10-3, editorial correction (page replacement). обновлена карта: AD 2.24.10-3, редакторская правка (замена листа). UKLI AD 2 chart AD 2.24.6-1 temporarily removed. карта AD 2.24.6-1 временно изъята. UKHH AD 2 updated chart: AD 2.24.7-1 (page replacement). chart AD 2.24.6-1 temporarily removed. обновлена карта: AD 2.24.7-1 (замена листа). карта AD 2.24.6-1 временно изъята. aeronautical information about AD Khmel'nyts'kyi is deleted. UKLH AD 2 исключена аэронавигационная информация, касающаяся АД Хмельницкий. UKDR AD 2 chart AD 2.24.6-1 temporarily removed. карта AD 2.24.6-1 временно изъята. ### GEN 2.7 SUNRISE/SUNSET TABLES / ТАБЛИЦЫ ВОСХОДА/ЗАХОДА СОЛНЦА

### GEN 2.7.1 General / Общие положения

The times in the tables are given in UTC for the beginning of civil morning twilight, sunrise, sunset and end of civil evening twilight for the year 2014.

The time given for the beginning of civil morning twilight and the end of civil evening twilight are calculated for an altitude of the Sun 6 degree below horizon.

below horizon.
GEN 2.7.2 Index / Указатель

В таблицах представлено время в UTC для начала гражданских утренних сумерек, восхода и захода солнца, конца гражданских вечерних сумерек для 2014 года.

Время, представленное для начала гражданских утренних сумерек и конца гражданских вечерних сумерек, рассчитано для высоты солнца 6° ниже горизонта.

### GEN 3.5.4 Types of services / Виды обслуживания

- 1. Meteorological services for flights at aerodromes are carried out by aerodrome meteorological offices. Meteorological information supplied to operators and flight crew members covers the flight in respect of its time, altitude and geographical extent. It includes the following information:
- a) weather reports in code forms METAR and SPECI (including TREND forecasts) for the aerodromes of departure, landing, and alternate aerodromes;
- b) forecasts in code form TAF and amendments there to for the aerodromes of departure, landing, and alternate aerodromes;
- c) warnings for the aerodrome of departure;
- d) forecasts of upper wind and upper-air temperature and also humidity (if available);
- e) forecast of significant en-route weather phenomena (conditions) or area forecasts GAMET;
- f) AIRMET information;
- g) SIGMET information and appropriate special air-reports AIREP SPECIAL(if available)relevant to the entire route concerned;
- h) SIGMET information of volcanic ash cloud and tropical cyclone (if available) relevant to the entire route concerned;
- i) surface weather charts;
- j) meteorological satellites data;
- k) advisory information for volcanic ash cloud and tropical cyclone relevant to the entire route concerned;

Besides, the flight crew members can be supplied with surface analysis charts, ground-based weather radar information and meteorological satellite images.

2. Depending on the type and duraction of the flight, the meteorological information is provided to the flight crews in the form of flight documentation and/or by direct consultation in the form of advice, briefing, demonstrating the necessary information.

- 1. Метеорологическое обеспечение полетов на аэродромах осуществляется аэродромными метеорологическими органами. Предоставляемая метеорологическая информация отвечает требованиям в отношении времени, высоты полета и географической протяженности полета. Она включает следующую информацию:
- а) сводки METAR или SPECI по аэродрому вылета, аэродрому посадки и запасным, в том числе прогнозы для посадки типа TREND;
- б) прогнозы ТАF и коррективы к ним по аэродрому вылета, аэродрому посадки и запасным:
- в) предупреждения по аэродрому вылета;
- г) прогнозы ветра, температуры воздуха, а также влажности (при наличии) на высотах;
- д) прогноз особых явлений (условий) погоды по маршруту полета или зональные прогнозы GAMET;
- e) информацию AIRMET;
- ж) информацию SIGMET по всему маршруту полета, а также специальные сообщения с борта AIREP SPECIAL (при наличии);
- з) информацию SIGMET об облаках вулканического пепла и тропических циклонах по маршруту полета (при наличии);
- и) приземные синоптические карты;
- й) данные метеорологических спутников Земли;
- к) консультативную информацию о вулканическом пепле и тропических циклонах, которая касается маршрута полета;
- Кроме того, экипажу могут предоставляться приземные синоптические карты, информация метеорологических радиолокаторов и изображения с метеорологических спутников Земли.
- 2. В зависимости от вида и продолжительности полета экипажам ACFT предоставляется метеорологическая информация в виде полетной документации и/или устно в виде консультации, инструктажа с демонстрацией необходимой информации.

### GEN 4.1 AERODROME/HELIPORT CHARGES / АЭРОДРОМНЫЕ/ВЕРТОДРОМНЫЕ СБОРЫ

### GEN 4.1.1 General provisions / Общие положения

- 1. The policy of Ukraine concerning imposition of charges in state airports is based on provisions of the Convention on International Civil Aviation and on principles recommended by the ICAO.
- 2. Imposition of charges for airport services within Ukraine is connected with the economical need to cover the operational expenses of the airports taking into account the measures for their improvement.
- 3. The Ministry of infrastructure of Ukraine promulgates the regulation and approves the basic rates of charges for ACFT and passenger services in the airports of Ukraine in accordance with the general policy in this matter and the economical follow-up, also taking into consideration the specific features of each airport.
- 4. The effective rates of charges for each airport of Ukraine are listed in Table 1.

- 1. Политика Украины относительно взимания сборов в государственных аэропортах основывается на положениях Конвенции о международной гражданской авиации и принципах, рекомендованных ICAO.
- 2. Взимание сборов за аэропортовое обслуживание в Украине связано с экономической необходимостью покрытия эксплуатационных расходов аэропортов с учетом планов их совершенствования.
- 3. Министерство инфраструктуры Украины осуществляет регулирование и утверждение основных ставок сборов за обслуживание АСРТ и пассажиров в аэропортах Украины в соответствии с общей политикой в этом вопросе и экономической целесообразностью с учетом индивидуальных особенностей каждого аэропорта.
- 4. Действующие ставки сборов для аэропортов Украины приведены в Таблице 1.

- (1) Charge is increased, if in the night-time it is performed:
- landing or take-off by 20%;
- both landing and take-off by 40%;
- (1)Сбор увеличивается, если в ночное время выполняется:
- посадка или взлет на 20%;
- как посадка, так и взлет на 40%;
- (2) for KYIV/Boryspil' airport charge is increased by 24% in the night-time, if the take-off and/or landing is performed in the night-time;
- (2) в аэропорту КИЕВ/Борисполь сбор увеличивается на 24 % в ночное время, если взлет и/или посадка выполняется в ночное время;
- (3)) for KYIV/Boryspil' airport charge rate for each transfer passenger that arrived and departs on international flights is USD 6.50;
- (3) в аэропорту КИЕВ/Борисполь для каждого отправленного трансферного пассажира, который прибыл и отправляется на международных рейсах, сбор за обслуживание пассажиров составляет 6,50 дол. США.
- (4) For the airports of Ukraine, except KYIV/Boryspil' and Dnipropetrovs'k, the coefficient of 0.5 is applied to the Charge for passenger servicing in the air terminal for transfer passengers who arrive and depart on international flights;
- (4) Во всех аэропортах Украины, кроме аэропорта Киев/Борисполь и аэропорта города Днепропетровск, при обслуживании трансферных пассажиров, которые прибывают и вылетают на международном рейсе, к ставке сбора за обслуживание пассажиров в аэровокзале применяется коэффициент 0,5.
- (5) For the airports of Ukraine, except Dnipropetrovs'k,- the coefficient of 0.5 is applied to the Aviation security charge for cargo ACFT in the absence of a commercial load of the flight on arrival and departure.
- (5) Во всех аэропортах Украины, кроме аэропорта города Днепропетровск, к сбору за обеспечение авиационной безопасности грузового АСFT применяется коэффициент 0,5 при отсутствии коммерческой загрузки рейса при прилете и вылете.
- (6) For the airports of Ukraine, except Dnipropetrovs'k:
- the coefficient of 0.5 is applied to the Extra-parking charge in case of a flight delay due to meteorological conditions;
- the Extra-parking charge is not collected if a flight delay was through the airport's personnel fault.
- (6) Во всех аэропортах Украины, кроме аэропорта города Днепропетровск:
- к сбору за сверхнормативную стоянку применяется коэффициент 0,5 в случае задержки авиарейса, вызванной метеорологическими условиями:
- сбор за сверхнормативную стоянку не взимается, если задержка авиарейса произошла по вине работников аэропорта.
- 5. Airport charge rates reported in Table 1 do not include V.A.T., that must be added to net amount for flights within Ukraine (standard V.A.T. in Ukraine is 20%).
- 6. Foreign operators shall pay airport charges in USD or in the currency indicated into the applicable interstate agreement, if any. Change rate to be applied for currency conversion according to the official exchange rate established by the National Bank of Ukraine for the date within which the services were provided.
- 7. For the airport Dnipropetrovs'k operators shall pay 50% of the airport charges in case of technical landing or ACFT regression from the take-off position, which are not related to disembarkation (embarkation) of passengers, loading (unloading) of baggage or mail, including flights of military aviation and humanitarian flights.
- 8. For airport Kharkiv in order to encourage airlines as business partners to establish the airport Kharkiv reduction factors to the collection of the landing/take-off ACFT and passenger service charges at Airport Terminal in size:

the first year of operation of scheduled flights - coefficient 0.3; second year of operation of scheduled flights - coefficient 0.5; the third year of operation of scheduled flights - coefficient of 0.7.

- 5. Ставки аэропортовых сборов, приведенные в таблице 1, не включают налог на добавленную стоимость, которую нужно прибавить к чистой стоимости при обслуживании внутренних рейсов (стандартный налог на добавленную стоимость в Украине 20%).
- 6. Иностранные эксплуатанты оплачивают аэропортовые сборы в долларах США. или в валюте, указанной в соответствующем межгосударственном договоре (если заключен). Ставка сборов применяется согласно официальному обменному курсу, установленному Национальным банком Украины на дату предоставления обслуживания.
- 7. Для аэропорта Днепропетровск эксплуатанты оплачивают 50% аэропортовых сборов в случае технической посадки или возвращения со старта АСFT, которые не связаны с высадкой (посадкой) пассажиров, погрузкой (выгрузкой) багажа, почты в т.ч. рейсы АСFT военной авиации, гуманитарные рейсы.
- 8. Для аэропорта Харьков с целью стимулирования авиакомпаний как коммерческих партнеров аэропорта Харьков установить понижающие коэффициенты к сбору за посадку-взлет АСРТ и сбору за обслуживание пассажиров в аэровокзале в размерах: первый год эксплуатации регулярного рейса коэффициент 0,3; второй год эксплуатации регулярного рейса коэффициент 0,5; третий год эксплуатации регулярного рейса коэффициент 0,7.

# ENR 1.6 ATS SURVEILLANCE SERVICE AND PROCEDURES. / ОБСЛУЖИВАНИЕ С ИСПОЛЬЗОВАНИЕМ СИСТЕМ НАБЛЮДЕНИЯ ОВД И ПРАВИЛА.

### ENR 1.6.1 Primary radar / Первичный радиолокатор

- 1. General
- 1.1. Radar stations operate as an integral part of radio navigation equipment in the ATC service and provide service to ACFT to meet the operational requirements.
- 1.2. ATS surveillance service is provided within:
- all the UTA/CTA sectors;
- TMA Kyiv TC-1, TMA Kyiv TC-2, TMA Kyiv TC-3, TMA Kyiv TC-4, TMA Kyiv TC-5;
- TMA Chernivtsi;
- TMA Dnipropetrovs'k Zone 1, TMA Dnipropetrovs'k Zone 2;
- TMA Kharkiv TC-1 Zone 1, TMA Kharkiv TC-1 Zone 2;
- TMA Zaporizhzhia;
- TMA Ivano-Frankivs'k;
- TMA L'viv;
- TMA Mariupol';
- TMA Mykolaiv;
- TMA Odesa TC-1, TMA Odesa TC-2;
- TMA Uzhgorod.

Description of indicated CTA's and TMA's is in paragraph ENR 2.1 ATS AIRSPACE.

- 2. The information provided by ATS surveillance systems used to:
- provide ATS surveillance services as necessary in order to improve airspace utilization, reduce delays, provide for direct routings and more optimum flight profiles, as well as to enhance safety;
- provide vectoring to departing ACFT for the purpose of facilitating an expeditious and efficient departure flow and expediting climb to cruising level:
- provide vectoring to aircraft for the purpose of resolving potential conflicts;
- provide vectoring to arriving ACFT for the purpose of establishing an expeditious and efficient approach sequence;
- provide vectoring to assist pilots in their navigation, e.g. to or from a radio navigation aid, away from or around areas of adverse weather;
- provide separation and maintain normal traffic flow when an ACFT experiences communication failure within the area of coverage;
- maintain flight path monitoring of air traffic.
- ENR 1.6.2 Horizontal separation minimum / Минимумы горизон
  1. The horizontal separation minima based on ATS surveillance system
- in ACC (CTA) 18,5km (10NM) or lateral separation minima for IFR flights crossing the flight level (altitude) occupied by traffic in the same direction traffic 10km at the moment of crossing;
- in APP (TMA) 9,3 km (5 NM).
- in TMA Ivano-Frankivs'k, Uzhgorod, Chernivtsi, Mykolaiv, Mariupol' 20km.
- 2. Horizontal separation minima, which are connected with wake turbulence, are applied to ACFT being provided with an ATS surveillance service in the approach and departure phases of flight.

Horizontal separation minima, which are connected with wake turbulence:

Heavy ACFT (H) follows Heavy ACFT (H) – 7,4km (4NM); Medium ACFT (M) follows Heavy (H) – 9,3km (5NM); Light ACFT (L) follows Heavy ACFT (H) – 11km (6NM); Light ACFT (L) follows Medium ACFT (M) – 9,3km (5 NM).

- 1. Общие положения
- 1.1. Радиолокационные станции являются составной частью радионавигационного оборудования службы ATC и обеспечивают обслуживание ACFT с целью удовлетворения эксплуатационных требований.
- 1.2. Обслуживание с использованием систем наблюдения ОВД предоставляется в пределах:
- всех секторов UTA/CTA;
- TMA Киев TC-1, TMA Киев TC-2, TMA Киев TC-3, TMA Киев TC-4, TMA Киев TC-5;
- ТМА Черновцы;
- ТМА Днепропетровск зона 1, ТМА Днепропетровск зона 2;
- TMA Харьков TC-1 Зона 1, TMA Харьков TC-1 Зона 2;
- ТМА Запорожье;
- ТМА Ивано-Франковск;
- ТМА Львов;
- ТМА Мариуполь;
- ТМА Николаев;
- TMA Одесса TC-1, TMA Одесса TC-2;
- ТМА Ужгород;

Описание указанных СТА и ТМА приведены в разделе ENR 2.1 ВОЗДУШНОЕ ПРОСТРАНСТВО ОВД

- 2. Данные систем наблюдения ОВД используются для:
- обеспечения необходимого обслуживания с использованием систем наблюдения ОВД с целью улучшения использования воздушного пространства, сокращения задержек, предоставления прямых маршрутов и более оптимальных профилей полетов, а также для повышения безопасности полетов;
- обеспечение ACFT, которые вылетают, векторением с использованием систем наблюдения ОВД в целях содействия организации ускоренного и эффективного потока, и ускорения набора высоты до крейсерского эшелона;
- обеспечения векторения с использованием систем наблюдения ОВД с целью решения возможных конфликтных ситуаций;
- обеспечение ACFT, которые прибывают, векторением с использованием систем наблюдения ОВД в целях содействия организации ускоренного и эффективного потока;
- обеспечение векторения с использованием систем наблюдения ОВД для предоставления навигационной помощи экипажам АСFT, например в направлении к радионавигационному средству или от него, в сторону от районов с неблагоприятными погодными условиями или в обход;
- обеспечения эшелонирования и поддерживания нормального потока воздушного движения в случае отказа связи на борту АСFT, которое находится в пределах зоны действия системы наблюдения ОВД;
- обеспечения мониторинга траектории полета.
- тального эшелонирования
  - 1. Минимумы горизонтального эшелонирования на базе использования систем наблюдения ОВД применяются:
  - в диспетчерском районе ACC (CTA) 18,5км (10NM) или минимальный интервал бокового эшелонирования при пересечении эшелона полета (высоты полета), занятого попутным ACFT при полетах по IFR 10км в момент пересечения;
  - в диспетчерском районе APP (TMA) 9,3 км (5 NM).
  - в ТМА Ивано-Франковск, Ужгород, Черновцы, Николаев, Мариуполь 20км.
  - 2. Минимумы горизонтального эшелонирования, которые связаны с турбулентностью в следе, применяются на этапах захода на посадку и вылета для АСFT, которым предоставляется обслуживание с использованием систем наблюдения ОВД.

Минимумы горизонтального эшелонирования, которые связаны с турбулентностью в следе:

Тяжелый (H) за Тяжелым (H) - 7,4км (4NM);

Средний (M) за Тяжелым (H) - 9,3км (5NM);

Легкий (L) за Тяжелым (H) - 11км (6NM);

Легкий (L) за Средним (M) - 9,3км (5 NM).

Indicated minima are applied in following cases:

- an ACFT is flying directly behind other ACFT at same altitude or less than 300m (1000ft) bellow;
- both ACFT are using the same RWY or parallel ones, that are located within 760m or less from each other;
- an ACFT is crossing behind another ACFT at the same altitude or less than 300m (1000ft) below.

ENR 1.6.3 Termination of ATS surveillance service. / Прекращени In the event of termination of ATS surveillance service, the ATC units provide where applicable procedural control service with the time intervals.

The minimum time intervals for longitudinal separation are:

- between ACFT on same or crossing tracks at the same level: 15 min at the moment of crossing;
- between ACFT climbing or descending on the same track in the case when an ACFT will pass through the level of another ACFT on same track: 15 min while vertical separation does not exist;
- between ACFT climbing or descending on crossing tracks: 15 min while vertical separation does not exist;
- between ACFT climbing or descending on opposite tracks in the case when lateral separation is not provided, vertical separation shall be provided for at least 10 min prior to and after the time the ACFT are estimated to pass, or are estimated to have passed.

### **ENR 1.6.4** Secondary surveillance radar (SSR) / Вторичный обзорный радиолокатор (SSR)

- 1. Emergency procedures
- 1.1. In a state of emergency the pilot-in-command of an ACFT shall set the transponder to code 7700, unless otherwise instructed by ATC.
- 1.2. If an ACFT equipped with a SSR transponder has been subjected to unlawful interference in the crew's activity, the pilot-in-command shall set mode A code 7500.
- 1.3. In case of a SSR transponder failure after departure, ATC units shall attempt to provide for continuation of the flight to the destination aerodrome in accordance with the FPL. Pilots may, however, expect to comply with specific restrictions.
- 1.4. In the case of a SSR transponder failure before departure, the pilot-in-command shall:
- inform ATS as soon as possible, preferably before submission of a FPL;
- insert in item 10 of the FPL the character N for complete transponder failure or, in case of partial transponder failure, insert the character corresponding to the remaining transponder capability;
- comply with published procedures for requesting an exemption from the requirements to carry a functioning SSR transponder; and
- if required by the appropriate ATS unit, plan to proceed to the nearest suitable aerodrome where transponder can be repaired.

### **ENR 1.6.5** System of SSR Code assignment / Система присвоения кодов SSR

- 1. SSR codes allocation will be provided according to procedures defined by European Air Navigation Plan (Doc. 7754) and European Secondary Surveillance Radar (SSR) Code Management Plan (Doc. 023).
- 2. The SSR code assignment will be dynamically provided by the **EUROCONTROL** Centralised SSR Code Assignment and Management System (CCAMS).
- 3. CCAMS will provide the assigned SSR code to the ATS Units for flights along the route of the FPL. The first ATS Unit in the CCAMS Area will assign the CCAMS Code to the flight concerned.
- 4. CCAMS may assign the same SSR code to several flights as long as these flights are SSR Code Conflict Free. Two flights are Code Conflict Free if these take place a certain distance or a certain time parameter.
- 5. For departures from inside the CCAMS area the code assignment time is a time parameter before the EOBT. CCAMS will assign SSR Codes based upon route and EOBT.

Перечисленные минимумы применяются в случаях, когда:

- ACFT выполняет полет непосредственно за другим ACFT на той же абсолютной высоте или менее чем 300м (1000футов) ниже, или
- оба ACFT используют одну RWY или параллельные RWY, расположенные на расстоянии меньше 760м одна от другой, или
- ACFT пересекает след другого ACFT на той же абсолютной высоте или менее чем 300м (1000футов) ниже.

### е обслуживания с использованием систем наблюдения ОВД.

В случае прекращения обслуживания с использованием систем наблюдения ОВД органы АТС обеспечивают где применяется процедурное управление временными эшелонирования.

Минимальные временные интервалы продольного эшелонирования:

- между ACFT на попутных или пересекающихся треках на одном уровне - 15 мин.;
- между ACFT, которые набирают высоту или снижаются, на попутных треках в случае, когда ACFT будет пересекать уровень полета другого ACFT на попутном треке - 15 мин., пока не установится вертикальное эшепонирование.
- между ACFT, которые набирают высоту или снижаются, на пересекающихся треках - 15 мин., пока не установится вертикальное эшелонирование:
- между ACFT, которые набирают высоту или снижаются, на встречных треках в случае, когда боковое эшелонирование не обеспечивается, вертикальное эшелонирование должно быть обеспечено как минимум в течение 10 мин. до и после того, как АСFT разойдутся или по расчетам разошлись.

- 1. Аварийные процедуры
- 1.1. Во время аварийных ситуаций командир АСГТ должен установить на бортовом ответчике код 7700, если нет других указаний органов ATC.
- 1.2. В случае незаконного вмешательства в действия экипажа ACFT, оборудованного бортовым ответчиком SSR, командир ACFT должен установить режим А код 7500.
- 1.3. В случае отказа бортового ответчика SSR после вылета органы АТС делают все возможное для обеспечения продолжения полета до аэродрома назначения в соответствии с FPL. Однако от пилотов может потребоваться соблюдение определенных ограничений.
- 1.4. В случае отказа бортового ответчика SSR до планируемого вылета, командир должен:
- проинформировать, как можно быстрее, органы ATS, желательно до подачи FPL:
- внести в пункт 10 FPL букву "N" в случае полного отказа ответчика или, в случае частичного отказа ответчика - букву, соответствующую сохранившимся функциям ответчика;
- действовать в соответствии с опубликованными процедурами, которые не предусматривают наличия бортового ответчика SSR;
- по требованию соответствующего органа ОВД, планировать полет до ближайшего подходящего аэродрома, где можно произвести ремонт ответчика.

- 1. Распределение кодов SSR будет осуществляется согласно процедур, определенных Европейским аэронавигационным планом (Doc. 7754) и Европейским планом менеджмента кодов SSR (Doc.
- 2. Назначение кодов SSR будет выполняться динамически системой централизованного распределения и управления кодами вторичной радиолокации (CCAMS) Евроконтроля.
- 3. CCAMS обеспечит назначение кодов SSR органам ОВД для АСFT, следующих по маршруту согласно FPL. Первый орган ОВД в регионе CCAMS назначит код SSR ACFT, который выдаст CCAMS в соответствии с FPL.
- 4. CCAMS может назначать один и тот же код SSR нескольким ACFT до тех пор, пока эти коды не дублируются внутри области CCAMS. Два ACFT внутри области CCAMS считаются такими, чьи коды не дублируются, если между ними существует определённое расстояние или временной интервал.
- 5. Для вылетов из региона CCAMS время назначения кода SSR это временной параметр перед расчетным временем уборки колодок (EOBT). CCAMS будет назначать коды SSR для ACFT на основании маршрута полета и времени ЕОВТ.

### **ENR 1.8** REGIONAL SUPPLEMENTARY PROCEDURES / ДОПОЛНИТЕЛЬНЫЕ РЕГИОНАЛЬНЫЕ ПРАВИЛА

Regional supplementary procedures are contained in ICAO Doc. 7030/5 (fifth edition).

The following procedures are also applied.

ENR 1.8.1 Rules and Procedures for Crossing the State Border of Ukraine / Правила пересечения Государственной границы Украины

1. Crossing the State border of Ukraine by aircraft performing the international flight is carried out within specified ATS routes in accordance with international agreements, laws and regulations of Ukraine.

Crossing the State border of Ukraine outside specified ATS routes shall be permited by:

- the General Staff of the Armed Forces of Ukraine by agreement with the Administration of the State Border Guard Service of Ukraine;
- the General Staff of the Armed Forces of Ukraine on the proposal of the Ministry of Foreign Affairs of Ukraine for the rescue and recovery services in case of emergencies caused by major accidents, catastrophes and natural disasters.
- 2. The appropriate permission given by the State Aviation Administration of Ukraine or the General Staff of the Armed Forces of Ukraine shall be considered as a necessary condition for authorization to cross the State border of Ukraine by Civil and State ACFT performing international flights with landing/departure at/from the Ukrainian territory.
- FPL or RPL submitted to the ATS unit of Ukraine and Ukraerocentre shall be considered as a necessary condition for authorization to cross the State border of Ukraine by Civil ACFT performing the transit flight through Ukrainian airspace.
- 3. Ukrainian ACFT returning from abroad may cross the State border of Ukraine regardless of the permission availability. In case of the permission unavailability the captain of the ACFT shall land at the international airport determined by Ukraerocenter by agreement with the State Border Guard Service of Ukraine and the State Customs Service of Ukraine. The permission for further flight of the ACFT shall be given by the State Aviation Administration of Ukraine.
- 4. In case of the ACFT cannot continue the flight after crossing the State border of Ukraine the backward crossing shall be carried out within the same bi-directional ATS route by clearance of the ATS unit of Ukraine. In case of the ACFT performing flight within uni-directional ATS route the backward crossing shall be carried out via ATS route determined by the ATS unit of Ukraine.

FPL or RPL presented to the Ukrainian ATS unit should be considered as a necessary condition for authorization to cross Ukraine State border for the transit GAT

- 5. In case of loss of radio communication Civil ACFT is permited to cross the State border of Ukraine and continue flight to the aerodrome of destination or alternative aerodrome under the following conditions:
- availability of FPL;
- obtaining information by ATS unit of Ukraine from ATS unit of neighboring State about the ACFT that has lost the radio communication;
- obtaining the appropriate information about the ACFT via SSR.
- 6. If there are direct ground channels between the ATS units of Ukraine and an adjacent State, ACFT crews shall obtain a clearance to cross the state border of Ukraine from the ATS unit by which they are supervised. Preliminary request by the aircrew for a clearance from the Ukrainian ATS unit of a State adjacent to Ukraine gives such a clearance only after obtaining it from the appropriate ATS unit of Ukraine.
- 7. The ACFT crews departing from aerodromes located near the border on the territory both of Ukraine and an adjacent State shall obtain the clearance to cross the State border at the departure aerodrome from the appropriate ATS unit having direct ground channel with ATS unit of State on whose territory the cross is planned.

Дополнительные региональные правила содержатся в ICAO Doc. 7030/5 ІСАО (пятое издание).

Также используются следующие дополнительные региональные правила.

- 1. Пересечение государственной границы Украины при выполнении международных полетов ACFT осуществляется по специально выделенным маршрутам ОВД на основании международных договоров, законодательства и правил Украины.
- Пересечение государственной границы Украины вне маршрутов ОВД разрешается:
- с разрешения Генерального штаба Вооруженных Сил Украины по согласованию с Администрацией Государственной пограничной службы Украины;
- аварийно-спасательным и аварийно-восстановительным службам при возникновении чрезвычайных ситуаций, вызванных крупными катастрофами и стихийными бедствиями, по представлению Министерства иностранных дел Украины с разрешения Генерального штаба Вооруженных Сил Украины.
- 2. Основанием для пересечения государственной границы гражданскими и государственными АСГТ, выполняющими международные полёты с посадкой/вылетом на/с территории Украины, является разрешение Госавиаслужбы Украины или Генерального штаба Вооруженных Сил Украины соответственно.

Основанием для пересечения государственной границы гражданскими АСГТ, следующими транзитом через воздушное пространство Украины, является представленный органам ОВД и Украэроцентру FPL или перечень RPL.

- 3. АСГТ Украины, которые возвращаются из-за границы, могут пересекать государственную границу независимо от наличия разрешения. В случае отсутствия такого разрешения командир АСFT обязан выполнить посадку в международном аэропорту, определенном Украэроцентром, по согласованию с органами Госпогранслужбы, Гостаможслужбой. Разрешение на дальнейшее выполнение полёта этого ACFT предоставляется Госавиаслужбой Украины.
- 4. Если ACFT после пересечения государственной границы Украины не может продолжать полёт, пересечение государственной границы в обратном направлении выполняется тем же маршрутом ОВД с разрешения органа ОВД Украины при условии, что на маршруте ОВД установлено двустороннее движение. При одностороннем движении на маршруте ОВД пересечение государственной границы в обратном направлении осуществляется по маршруту ОВД, установленному органами ОВД.

Основанием для пересечения государственной границы гражданскими ACFT, которые следуют транзитом через воздушное пространство, есть поданный органам ОВД и Украэроцентру FPL или перечень RPL. 5. В случае потери радиосвязи гражданским ACFT разрешается пересекать государственную границу и продолжать полет до аэродрома назначения или запасного аэродрома при следующих

- условиях: - наличия FPL;
- получения органом ОВД Украины от органа ОВД сопредельного государства информации о движении АСГТ, потерявшего радиосвязь; - получения соответствующей информации о АСГТ каналом вторичной радиолокации.
- 6. Если есть прямые наземные каналы связи между органами ОВД Украины и смежными государствами, разрешение на пересечение государственной границы Украины экипажи АСГТ получают от органа ОВД, руководящего их полетом. Предварительный запрос экипажем разрешения у органа ОВД Украины в этом случае не нужен. Орган ОВД смежного с Украиной государства выдает такое разрешение лишь после получения его от соответствующего органа ОВД Украины.
- 7. Разрешение на пересечение государственной границы Украины экипажи АСҒТ, вылетающие с аэродромов, расположенных вблизи границы, как на территории Украины, так и на территории смежного государства, получают на аэродроме вылета от соответствующего органа ОВД, имеющего прямой наземный канал с органом ОВД государства, на территорию которого планируется пересечение.

Limits of ATS routes for crossing the State Border of Ukraine in both sides from centerline are determined:

Границы маршрутов ОВД для пересечения Государственной границы по ширине в обе стороны от оси устанавливаются:

5NM (9.3km) for ATS routes in vertical limits: FL280 - FL660;

по 5NM (9.3км) для маршрутов ОВД в вертикальных границах: FL280 - FL660;

2.7NM (5km) for ATS routes in vertical limits: 1850m - FL270;

по 2.7NM (5км) для маршрутов ОВД в вертикальных границах: 1850m - FL270;

2.7NM (5km) for airspace Class G.

по 2.7NM (5км) для воздушного пространства класса G.

AIP of Ukraine

ENR 2.1-1 25 JUN 2015

# ENR 2.1 AIR TRAFFIC SERVICES AIRSPACE / ВОЗДУШНОЕ ПРОСТРАНСТВО ОВД

ENR 2.1.1 UIR - Upper flight information region, FIR - Flight information region, UTA - Upper control area, CTA - Control area, TMA - Terminal control area. / UIR - Район полетной информации верхнего воздушного пространства, FIR - Район полетной информации, UTA - верхний диспетчерский район, CTA - Диспетчерский район, TMA - Узловой диспетчерский район.

1. UIR KYIV

Airspace within the lateral limits of UIR KYIV between FL 290 and FL 410 inclusively is the EUR RVSM airspace.

1. UIR KИЕВ
Воздушное пространство в горизонтальных пределах UIR КИЕВ между
FL290 и FL410 включительно является воздушным пространством

		EUR RVSM.
